

## Active Learning for Computer Vision Curriculum

### Project 8 Solution: Active Learning for Regression

**Total Points Possible: 50**

#### **Problem 1 (50 points)**

A sample output is shown below. The correct answer should resemble this output.

**Note:** this graph is from the paper by Cai et al. (discussed in the lecture material). This experiment was conducted on a different dataset with different training, unlabeled and test splits. Thus, the output on the Flickr dataset may not exactly match this output. This should just be used as a reference.
