Active Learning for Computer Vision Curriculum

Project 3 Solution: Pool-based Active Learning – Part 1

Total Points Possible: 50

Problem 1 (50 points)

A sample output is shown below. The correct answer should resemble this output.

Note: this graph is from the paper by Holub et al. (discussed in the lecture material). This experiment was conducted on a different dataset with different training, unlabeled and test splits. Thus, the outputs on the VidTIMIT and MindReading datasets may not exactly match this output. This should just be used as a reference.
